BEER LINE CLEANER

DESCRIPTION

PROVEN EFFECTIVE IN LONG & SHORT LINES AND IN WARM OR COLD WATER

RINSES CLEAN INSTANTLY WITH COLD BEER OR WATER

To serve the best tasting beer and wines, clean dispensing lines are absolutely essential. BEER LINE CLEANER is a potent, non-foaming detergent for cleaning beer and wine lines. It quickly flushes out beverage residues and other deposits to leave the lines perfectly clean and maintains the natural aroma and true flavor of the beverages in dispensing systems. Regular cleaning of beer lines and faucets assures that the beer tastes and smells as appetizing and fresh as the day it was brewed.

DIRECTIONS

The amount of cleaning solution required is determined by the length of the beer or wine lines. For short lines, 1 quart is sufficient. Long lines require 2 to 3 quarts. Use 1/2 to 1 ounce of BEER LINE CLEANER per quart of warm or cold water. Pump the cleaning solution through the lines and rinse thoroughly with cold water or beer.

To clean faucets, disassemble and soap in cleaning solution, then rinse faucet parts with clean water before reassembling.

*For industrial and commercial use only.
For additional information, see Safety Data Sheet.*
